SUBJECT INDEX TO VOLUME 48

A-apo-myoglobin complex, heme A reconstituted, 21
Adenosine, vanadium oxide^{2+} interaction with, 15
Agaricus bisporus, siderophore-mediated iron(III) transport and, 183
α-Amino acid 2-amino-2-deoxy-D-glycero-D-gulo-heptonic acid, divalent transition-metal ion coordination to, 129
Amino acids
  mercury(II) and, 227
  metal ion transport and, 129
  palladium and platinum complexes, 135
  trimethyltin(IV) and, 271
Amino sugars, iron complexes with small glycopeptides and, 55
Aminoalcohols, propranolol, 153
Antimicrobial activity, organotin compounds and, 251
Antitumor activity
  glycopeptides and, 55
  metal complexes and, 1
  platinum complexes of p- and m-aminobenzamidine and, 163
Antiulcero-genic agents, famotidine, 233
Azurin, cytochrome *c* peroxidase of *Pseudomonas aeruginosa* and, 71
Beta-alanine(HL), mercury(II) and, 227
Bezafibrate acid, nitric oxide derivative of ferrous human hemoglobin and, 47
2,2'-Bipyridine, cytotoxicity and DNA binding studies of, 63
Cadmium
  cadmium:sulfide crystallites and *Candida glabrata*, 95
  transcription factor IIIA and, 107
Candida glabrata, cadmium:sulfide crystallites in, 95
Chromium ions, nucleoside triphophates, nucleic acids, and, 289
Chromium-ATP complexes, yeast phosphoglycerate kinase and enzyme active site, 203
Chromium-nucleotide complexes, 85
Chromium-uric acid complexes, 85
Cimetidine, famotidine vs., 233
cis-$Pt(NH_3)_2Cl_2$, cis-DDP, antitumor activity and, 163
Clofibric acid, nitric oxide derivative of ferrous human hemoglobin and, 47
Copper complexes
  famotidine and, 233
  LH and FSH release and, 41
  1,10-phenanthroline and, 121
  propranolol and, 153
Copper protein, azurin-cytochrome *c* peroxidase complex, 71
Copper transferrin, extended x-ray absorption fine structure (EXAFS) studies on, 33
Cytochrome *c*, K_2PtCl_4 interaction with, 197
Cytochrome *c* peroxidase, azurin and, 71
Cytochrome *c* oxidase, heme A stereochemistry and, 21
Cytotoxicity, platinum(II) and palladium(II) complexes and, 63
Deoxymyoglobin mutants, oxidations of, 79
Des ferrirhodin, iron transport and, 183
2,6-Diacetyopyridine nicotinoyl- and isonicotinoylhydrazones, organotin compounds and, 251
Dipeptides
  disaccharide, iron complexes and, 55
  muramyl, iron complexes and, 55
Diuretic activity, organomercury(II) complexes and, 305
DNA binding studies, platinum(II) and palladium(II) complexes and, 63
Electron paramagnetic resonance studies
  See also Spectral studies
  copper(II) complexes of propranolol and, 153
  vanadium(IV) and oxovanadium(IV) complexes of hydroxamic acids, 279
Electron spin resonance studies
  See also Spectral studies
  Rhus succedanea peroxidase and, 299
Enkephalin complexes, manganese(II)-leucine-, 173
Enzyme active site, yeast phosphoglycerate kinase inactivation by chromium-ATP complexes and, 203
Equilibrium dialysis, zinc, nickel, and cadmium interactions with transcription factor IIIA and, 107
Extended x-ray absorption fine structure (EXAFS) studies, copper transferrin, 33
Famotidine, metal ions and, 233
Ferric fusarinine, iron transport and, 183
Ferric hydroxamates, iron restricted *Agaricus bisporus* cells and, 183
Ferrichrome, iron transport and, 183
Genotoxic activity
  chromium and, 289
  organotin compounds and, 251
Glutathione, cadmium:sulfide crystallites in *Candida glabrata* and, 95
Glycine(HL), mercury(II) and, 227
Glycopeptides, iron complexes with amino sugars and, 55
Gulo-heptonic acid complexes, 129
Haber-Weiss reaction, iron-diethylenetriaminepentaacetate and, 241
Heme A, spectroscopic characterization of heme A reconstituted myoglobin, 21
Hepatic DNA, metal complexes and, 1
Hepatic RNA, metal complexes and, 1
Histamine H_2 receptor blocking effects, famotidine and, 233
Histidine complexes
  crystal structures of, 135
  spectroscopic studies of, 135
  trimethyltin(IV) complexes and, 271
Hydroxamic acids, vanadium(IV) and oxovanadium(IV) complexes of, 279
Iron, deoxymyoglobin mutants oxidation and, 79
Iron complexes
  amino sugars and small glycopeptides in, 55
  cytochrome *c* and K_2PtCl_4, 197
  diethylenetriaminepentaacetate and, 241
Iron transferrins, extended x-ray absorption fine structure (EXAFS) studies on copper transferrin vs., 33
Iron transport, siderophore-mediated, 183
Iron-diethylenetriaminepentaacetate, Haber-Weiss reaction and, 241
1-Isopropylamine]-3-[1-Naphthyloxy]-2-propranolol)copper(II) complexes of, 153
K_2PtCl_4, cytochrome *c* interaction with, 197
Lacquer latex, oxidation and polymerization, 299
LHRH complex, LH and FSH release and, 41

Lys45/Arg45, deoxymyoglobin mutants oxidation and, 79
Magnetic circular dichroism spectra, *Rhus succedanea* peroxidase and, 299
Manganese(II)-leucine-enkephalin complexes, nuclear magnetic resonance imaging investigations of, 173
Mercury complexes, amino acids and, 227
Metal complexes, antitumor activity of, 1
Metal ion-ligand interactions, 121, 129
Metal ions, famotidine and, 233
Metal-bases anticancer agents, 163
Methionine complexes
  crystal structures of, 135
  spectroscopic properties of, 135
Nickel compounds
  famotidine and, 233
  LH and FSH release and, 41
  1,10-phenanthroline and, 121
  transcription factor IIIA and, 107
Nitric oxide derivative of ferrous human hemoglobin, bezafibrate and clofibrate acid effect on, 47
Nucleic acids, chromium ions and, 289
Nucleoside triphosphates, chromium ions and, 289
Organomercury(II) complexes, diuretic activity of, 305
Organotin compounds
  2,6-diacetylpyridine nicotinoyl- and isonicotinoylhydrazones and, 251
  trimethyltin(IV) complexes and amino acids, 271
Oxovanadium(IV) complexes, hydroxamic acids, related ligands, and, 279
Palladium complexes
  crystal structures of, 135
  cytotoxicity and DNA binding studies of, 63
Peptides, cadmium:sulfide crystallites in *Candida glabrata* and, 95
Peptidoglycan monomer, iron complexes and, 55
1,10-Phenanthroline, copper and nickel complex stability with, 121
Phosphoglycerate kinase, substrate binding to yeast, 203
Platinum chloride, chloro(*trans-R,R*-1,2-diaminocyclohexane)(N-methyliminodiacetato), crystal structure of, 217
Platinum complexes
  crystal structures of, 135
  cytochrome *c* and K_2PtCl_4, 197
  cytotoxicity and DNA binding studies of, 63
  N-methyliminodiacetato *trans-R,R-*, *trans-S,S-*, and *cis*-1,2-diaminocyclohexane, 217
  platinum(II) aminobenzamidine complexes, 163
Porphyrin, heme B reconstitution and, 21
Propranolol, copper complexes of, 153
Pseudomonas aeruginosa, azurin-cytochrome *c* peroxidase complex and, 71
2-Pyrazinecarboxylic acid, cytotoxicity and DNA binding studies of, 63
2-Pyridinecarboxylic acid, cytotoxicity and DNA binding studies of, 63
Rhus succedanea peroxidase compounds, 299
Siderophores, iron transport and, 183
Spectral studies
  See also Electron paramagnetic resonance studies, Electron spin resonance studies
  antitumor activity of metal complexes, 1
  bezafibrate and clofibric acid effect on nitric oxide derivative of ferrous human hemoglobin, 47
  chromium complexes of uric acid, 85
  chromium ions impact on DNA and nucleoside triphosphates, 289
  copper transferrin, 33
  copper(II) complexes of propranolol, 153
  cytochrome *c* and K_2PtCl_4, 197
  famotidine, 233
  heme A reconstituted myoglobin, 21
  iron(III) complexes with amino sugars and small glycopeptides, 55
  iron-diethylenetriaminepentaacetate and Haber-Weiss reaction, 241
  manganese(II)-leucine-enkephalin complexes, 173
  methionine and histidine Pd(II) and Pt(II) complexes, 135
  organomercury(II) complexes diuretic activity, 305
  organotin compounds, 251
  platinum complexes of p- and m-aminobenzamidine, 163
  platinum(IV) complexes, crystal structure of, 217
  siderophore-mediated iron(III) transport, 183
  vanadium(IV) and oxovanadium(IV) complexes of hydroxamic acids, 279
  vanadium oxide^{2+} interaction with adenine in nucleotides, 15
Sulfide-containing cadmium peptide complexes, *Candida glabrata* and, 95
Superoxide/hydrogen peroxide systems, iron-diethylenetriaminepentaacetate and, 241
Theobromine, organomercury(II) complexes and, 305
Theophylline, organomercury(II) complexes and, 305
Transcription factor IIIA, zinc, nickel, and cadmium interactions with, 107
Trimethyltin(IV) complexes, amino acids and, 271
Uric acid, chromium complexes of, 85
Vanadium(IV) complexes, hydroxamic acids, related ligands, and, 279
Vanadium oxide^{2+}/nucleotide interactions, 15
Xenopus, zinc, nickel, and cadmium interactions with, 107
Yeast phosphoglycerate kinase, chromium-ATP complexes and enzyme active site, 203
Zinc
  LH and FSH release and, 41
  transcription factor IIIA and, 107
